HyDRIVE — HyBRID CONE TECHNOLOGY A REVOLUTION IN BASS AMPLIFICATION

whyhydrive.com | hartke.com | myspace.com/hartkesystems

Hartke is distributed worldwide by

Samson Technologies • 45 Gilpin Avenue • Hauppauge, NY 11788 • 631-784-2200 • samsontech.com
In a continuing effort to make the highest quality product possible, we reserve the right to upgrade and or change the products represented and information stated in this catalog.

A REVOLUTION IN BASS AMPLIFICATION

البائعة والموالي والما

HOW IT ALL BEGAN

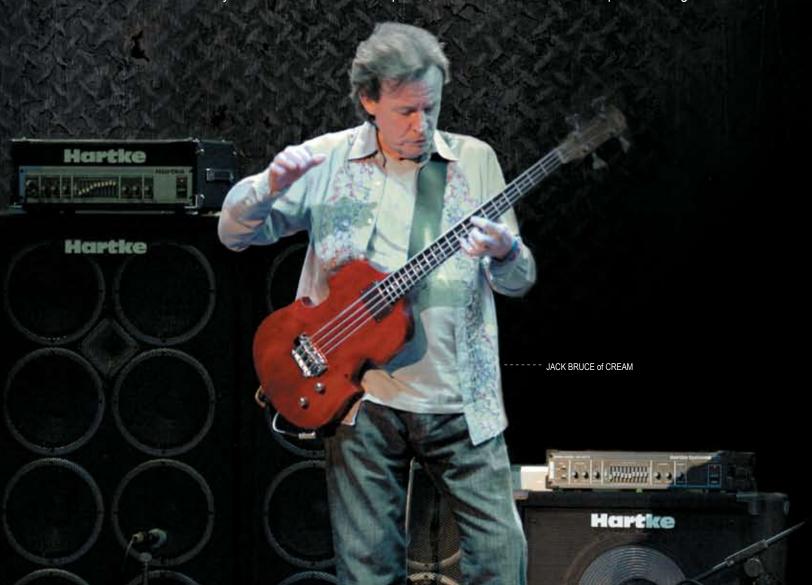

Hartke changed the world of bass amplification when we introduced the aluminum cone bass speaker, it gave bass players a wider tone spectrum to cleanly reproduce the mids and highs in modern bass styles. And they were embraced by a generation of players.

Over the years, we heard that some Hartke artists liked to put one of our aluminum cone cabinets on stage with a paper cabinet. They loved the clarity of their aluminum Hartke cabs, and they loved the depth on the low end that they could only get from paper.

Fast forward to 2005. Jack Bruce reunited with fellow Cream members Eric Clapton and Ginger Baker for the first time in nearly 30 years. On the biggest stages in the world was the inspiration for HyDrive. He played through a pair of Hartke traditional paper cone speaker cabinets, and a classic aluminum speaker cabinet.

Our engineers had already been considering ways of combining the aluminum cones that had made our company famous with

traditional paper cones. The goal was to create a new speaker that was unique, powerful and inspiring. Now, HyDrive has arrived. The result of over three years of research and development, another revolution in bass amplification begins.

HyDRIVE — HyBRID CONE TECHNOLOGY

HyDrive transducers represent a vast improvement and a major leap forward in bass speaker technology. By fusing paper and aluminum in a unique, roadworthy cone design, we created a driver that is more robust and efficient than anything previously available.

With Hartke's HyDrive series, you get the best of both worlds: the warm tone of traditional paper cones and the clear, punchy attack of aluminum cones. HyDrive's patent pending Hybrid Cone Technology results in a speaker that uses an outer paper cone to push a warm, deep low frequency and an inner aluminum cone that produces mids and highs that cut, yet are still sweet.

Incorporating a cast aluminum frame design and extraordinary heat dissipation, the HyDrive speaker uses motors constructed with large diameter voice coils and neodymium magnets yielding some of the highest power of any speaker available in a bass cabinet.

HEAVYWEIGHT POWER... WITHOUT THE HEAVY WEIGHT

One of the most important advances with the HyDrive speaker is its power to weight ratio. A HyDrive speaker weighs 40% less than a traditional speaker of equal power. The 10-inch version weighs just 5 pounds and handles a robust 250 Watts RMS power, and at only 9 pounds the 15-inch delivers an enormous 500 Watts RMS power.

POWER AND TONE

THE MOTHER OF ALL BASS RIGS

Industrial strength everything. That's what J.D. DeServio of Black Label Society gets with the flagship of the line. Power for days, steel grill and recessed side handles, a diamond aluminum kickplate, and underneath, a pair of roadworthy, steel casters. The HyDrive 810 was designed for demanding players who need critical performance at intense volume levels.

Perfectly suited for all kinds of bass playing, Hartke engineers also specifically designed the HyDrive 810 with the midrange frequencies rock players rely on night after night on stages all over the world. And the HyDrive 810 is a sealed, quad-chambered cabinet, constructed with the highest quality plywood, extensive bracing and dado joinery, making it rigid yet lightweight.

You need power? The HyDrive 810 handles up to 2,000 Watts of hammering power in the lightest 8×10 cabinet around. That's more than double the power capacity of other 8×10s. To get this much power from traditional cones, you would need a cabinet that had 20 speakers and weighed nearly 400 pounds!

HyDRIVE HX810

- > 8 × 10 inch 250-Watt HyDrive
- neodymium hybrid cone drivers > 1-inch Titanium Compression Driver
- > Power Handling: 2,000 Watts
- > Impedance: 4 Ohms
- Frequency Response: 25 Hz To 17 kHz
- Sensitivity: 99 dB @ 1 W/1 m
- > Speakon and 1/4" Inputs
- > High-Frequency Attenuation Switch
- > Large handle and casters for easy transport
- Dimensions: 47.25"(H) × 26"(W) × 15.75"(D)
- Voice Coil: 2.5"

A CLASSIC... REBORN

This classic setup gives Nate Watts a little extra booty on the bottom. Like the 810, everything about the 410 says ready for the road. With power to spare the HyDrive 410 features four 250 Watt 10-inch hybrid speakers for a total power handling of 1,000 Watts. The HyDrive cabinet is beautifully appointed with a steel grill and corners, recessed handles and removable casters, making it easy to transport. The HyDrive 410 is a sealed, dual-chamber cabinet made from the highest quality plywood with extensive bracing and dado joints, making it rigid yet lightweight.

Pair this bad boy with the HyDrive 115 for a classic two cabinet rig that thunders so much bass it will literally make your hair stand on end. The HyDrive 115 boasts one of the lightest 15" speakers ever made and at 51 pounds, the 115 handles 500 Watts of robust, bone-crushing power.

HyDRIVE HX410

- Dual-Chamber, Sealed Cabinet
- 4 × 10 inch 250-Watt HyDrive
- neodymium hybrid cone drivers > 1-inch Titanium Compression Driver
- > Power Handling: 1000 Watts
- > Impedance: 8 Ohms
- > Frequency Response: 30 Hz To 17 kHz
- > Sensitivity: 99 dB @ 1 W/1 m
- > Parallel Speakon and 1/4" Inputs
- > High-Frequency Attenuation Switch
- (On, -6 dB, Off)
- Removable Casters
- > Dimensions: 24"(H) × 24"(W) × 15"(D)
- > Voice Coil: 2.5"
- Weight: 68 lb

HyDRIVE HX115

- > Specially Tuned, Ported Cabinet Design
- > 1 × 15 inch 500-Watt HyDrive
- neodymium hybrid cone drivers > 1-inch Titanium Compression Driver
- > Power Handling: 500 Watts
- > Impedance: 8 Ohms
- > Frequency Response: 20 Hz To 17 kHz
- > Sensitivity: 98 dB @ 1 W/1 m
- > Parallel Speakon and 1/4" Inputs
- > High-Frequency Attenuation Switch
- > Removable Casters
- > Dimensions: 24"(H) × 24"(W) × 15"(D)
- > Voice Coil: 3"
- > Weight: 51 lb

"THE HYDRIVE GEAR IS SLAMMIN"! THIS IS WHAT I NEED TO BATTLE THE WALL OF DOOM ON THE BLACK LABEL STAGE! BLEED BLACK LABEL"

"HARTKE AMPS ARE SO CLEAN AND POWERFUL, I HAVEN'T TURNED IT PAST 1 THE WHOLE STEVIE WONDER TOUR."

COMBOS VERSATILITY AND POWER

VERGATIENT AND IS

Stu Hamm is a consummate professional who works in an almost infinite variety of settings. So when Hartke engineers began planning the HyDrive

less weight, thanks to their patent-pending HyDrive speakers.

EXPAND YOUR MUSICAL BOUNDARIES

The HyDrive combos all feature 250 Watts of clean linear power. The amplifier's power supply features a massive toroidal transformer providing solid low frequencies at any volume level. So HyDrive combos can handle the input signal from virtually any bass, passive to active, with enough power to hang with your guitar player's stack.

series of combos, Stu had a few ideas. The result is a remarkable series of combos that give players all the power they need with more features and

Onboard Hartke Shape Control and Bass Attack Overdrive allow you to control every aspect of your sound. From shaping highs and mids, to dialing up some creamy distortion, your HyDrive combo is right at home with any style of bass playing. Add a 7-Band EQ along with bass and treble shelving and you have the most versatile combo available.

The highest quality plywood is used to construct the HyDrive combo cabinets which have the same extensive bracing and dado joints found in the large HyDrive cabs. Vinyl covering combined with steel grills and corners provide added protection while moving the amplifier from gig to gig. And of course, the HyDrive combos feature the original, Kickback® design allowing you to better project your sound while on stage.

"HARTKE AMPS AND SPEAKERS HAVE BEEN ESSENTIAL TO MY SOUND FOR OVER 15 YEARS. THE TONAL RANGE THEY GIVE ME HAS ALLOWED ME TO EXPAND MY MUSICAL BOUNDARIES. I JUST CAN'T BE STU WITHOUT THAT HARTKE SOUND."

1.000 WATTS OF TRUE POWER

RAISING THE STANDARD... AGAIN

The Hartke Kilo raises the standard for bass amplification. Packed with an amazing feature set and more than enough power to drive any cabinet, the Kilo

is the bass head that discerning players demanded. Two separate power blocks deliver a true 1,000 Watts at 4 ohms in bridged mono or 500 Watts per side in either stereo or dual mono.

Onboard is a classic tube overdrive, tube EQ section, optical compressor, 10-Band graphic EQ, and selectable 4-point direct out with level for complete

control over every aspect of your tone. The Kilo provides robust, full-range power that will shake the foundation for discriminating players in every style.

Players like J.D. DeServio of Black Label Society and Tim King of Soil can play any amp they want. They choose the Hartke Kilo

- > True 2 × 500 Watts of power, 1,000 Watts bridged mono
- Bass, Mid, Treble Tube EQ
- 10-Band Graphic EQ
- > World famous Hartke Shape Control
- > Optical Compressor
- > Hartke Bass Tube Overdrive
- > Deep and Brite switches
- > Direct output with level control and select switch
- to choose input, compressor, EQ or effects
- > Front panel tuner output jack
- > XLR balanced direct output with ground lift switch
- > Footswitch jacks for Mute, EQ, Overdrive and EFX
- > 1/4-inch and Speakon™ output connectors
- > Three rackspace chassis with milled aluminum faceplate and oversize handles

REAR PANEL OF THE KILO 1000

GEO

LH1000 HEAD

The LH1000 has a classic 12AX7 Class-A tube front-end design, 3-Band all tube EQ plus bright and limiter switches driving a massive two-channel 1000 Watt power amplifier. Its easy front panel layout makes on-the-fly adjustments a breeze.

With a two rackspace, metal frame chassis, steel faceplate and steel handles, the LH1000 delivers raw, reliable power to your speakers. Easy to use, the warmest tone and power to spare.

LH1000

- > 2 × 500 Watts of power, 1000 Watts bridged mono
- > Classic 12AX7 High Voltage Class-A tube preamp circuit
- > Bass, Mid, Treble, contour controls
- > Selectable brite switch for added high frequency response
- > Selectable limiter switch with LED indicator
- > Balance control blends level of A & B outputs
- > Front Panel XLR Balanced Direct output
- Rear Panel 1/4-inch Effects Loop
- > 1/4-inch plus Speakon™ output connectors
- Two rackspace metal chassis with steel faceplate and handles

- REAR PANEL OF THE LH 1000

LH500 HEAD

Like its big brother, the LH500 features a classic high-voltage tube front end. With 500 Watts of power, the easy-to-use LH500 delivers an extremely loud, warm tone that's ready for any stage or studio.

LH500

- > 500 Watts of power
- Classic 12AX7 High Voltage Class-A tube preamp circuit
- > Bass, Mid, Treble, contour controls
- > Selectable bright switch for added high frequency response
- > Selectable limiter switch with LED indicator
- > Front Panel XLR Balanced Direct output
- Rear Panel 1/4-inch Effects Loop
- > 1/4-inch output connectors
- > Two rackspace metal chassis with steel faceplate and handles
